UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

NOTICE OF PROPOSED MODIFICATION OF VEOLIA'S TITLE V PERMIT

This notice is to inform the public that the U.S. Environmental Protection Agency is reopening a Clean Air Act Titl V operating permit for Veolia ES Technical Solutions, L.L.C. (Veolia), located at 7 Mobile Avenue, Sauget, St. Clai iois, to add feedrate limits for certain heavy metals. The heavy metals include mercury, semi-volatil metals (cadmium and lead), and low volatile metals (arsenic, beryllium, and chromium)

A. Facility Description

Veolia owns and operates a hazardous waste incinerator in Sauget, St. Clair County, Illinois. Veolia's Sauget facility is a treatment, storage and disposal facility, which accepts offsite waste for disposal through incineration. Veolia receives containers and bulk shipments of hazardous and solid wastes, transfers them to temporary storage facilities rocesses them, and incinerates them in one of three combustion units. The facility includes two fixed-hearth, dua hamber, multi-type feed incinerators (Incinerators 2 and 3), each rated at 16 million British thermal units per hou mmBtu/hr), and one rotary kiln incinerator (Incinerator 4) rated at 50 mmBtu/hr. Incinerators 2 and 3 each use pray dry absorbers with lime slurry injection to control hydrogen chloride emissions and baghouses for particulate matter. Incinerator 4 uses a sprav dry absorber for hydrogen chloride control, an activated carbon injection syster for mercury control, and a baghouse for particulate matter control.

Veolia's Sauget facility is located just east of St. Louis, Missouri, in an area with potential environmental justic

B. Proposed Actions

EPA has determined that Veolia's current Title V permit does not assure compliance with the standards at 40 C.F.R § 63.1219. Therefore, EPA is reopening Veolia's permit pursuant to 40 C.F.R. § 71.7(f)(iv) to 1) incorporate feedrate limits that EPA considers to be supported by the available test data, and 2) supplement monitoring requirements, as necessary, to assure compliance with the proposed feedrate limits. Thus, EPA is making available for public com ment a draft significant modification to Title V Permit No. V-IL-1716300103-08-01 (draft permit). The dr. is subject to a minimum 30-day public comment period as required by 40 C.F.R. §§ 71.7(f) and 71.11(d).

As required by 40 C.F.R. § 71.11(b), EPA has provided the reasons supporting our proposed actions in a statemer of basis which is available as part of the administrative record for this action

C. Request for Public Comment

EPA requests public comment on our proposal to reopen and modify Veolia's Title V permit. The public comme period for EPAs draft permit ends **March 15, 2013**. Only portions of the permit that are being changed because of the proposed action are open for comment during the comment period. Members of the public may review the ad-ministrative record for the modifications contained in the draft permit, including copies of the draft permit prepared by EPA, the statement of basis for the draft permit, the application, and all data and supporting materials submitted

(1) www.regulations.gov docket ID EPA-R05-OAR-2012-0649; www.epa.gov/region5/newsevents/ and look in the "public comment" section; Central Library, 1301 Olive St., St. Louis, MO 63101;

(4) East St Louis Library, 5300 State St., East St. Louis, IL 62203;

(4) Last of Lobria, Library, 140 Cahokia Park Drive, East St. Louis, IL 62206; and (6) EPA Region 5, 77 West Jackson Boulevard, 18th floor, Chicago, Illinois 60604, by contacting David Ogulei at 312) 353-0987 or ogulei.david@epa.gov. All documents will be available for review at the EPA Region 5 office in Chicago Monday through Friday from 8:15 AM until 4:45 PM (excluding federal holidays).

Pursuant to 40 C.F.R. §71.11(f), EPA is holding a **Public Hearing on February 19, 2013** at the Distanc Learning Lab, Room 2083, in Building B of the Southern Illinois University Edwardsville – East St. Louis Hi Education Campus, 601 James R. Thompson Blvd., East St. Louis, Illinois 62201 from 3:00 PM to 7:00 PM. proposed action. The EPA may ask clarifying questions during the oral presentations, but will not respond to the presentations at that time. The EPA will consider written statements and supporting information submitted during the comment period with the same weight as any oral comments and supporting information presented at the public hearing. Supporting materials submitted with written comments must be included in full and may not be incorpo-rated by reference unless they are already part of the administrative record, or consist of state or federal statutes or regulations, EPA documents of general applicability, or other generally available reference materials.

If you would like to provide oral testimony at the hearing, you must register your name on the sign-in sheet that will be available at the hearing venue on the date of the hearing. You will be called to testify on a first-come-first-serve basis. Oral testimony will generally be limited to five to ten minutes, depending on the number of speakers, for each commenter to address the draft permit. EPA will not provide equipment for commenters to show overhead slides or make computerized slide presentations. Commenters should notify Andrea Morgan at morgan.andrea@ epa.gov, or fax: (312) 692-2920, by **February 5, 2013**, if they need specific translation services for non-Engl

The EPA encourages commenters to provide written versions of their oral testimonies either electronically or o computer disk or CD ROM or in paper copy. Written comments and requests to receive notices of any future action mmenters to provide written versions of their oral testimonies either electronically or on may be submitted to EPA by March 15, 2013, using one of the following methods: (1) www.regulations.gov Docket ID No. EPA-R05-OAR-2012-0649; (2) http://www.epa.gov/region5/publicnotices/veolia.htm; (3) *E-mail*: mooney.john@epa.gov; (4) I (312) 692-2551; or, (5) *Mail*: George Czerniak, Director, Air and Radiation Division (A-18J), at the above EPA address. All written comments should include: the reason for interest in the draft permit, requested actions for EPA to take, and the justification for such actions. All comments should include sufficie specificity and regulatory references to allow EPA to investigate the merits of the position. All comments will be cluded in the public docket without change and may be made available to the public, including any persona information provided, unless the comment includes Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Information that you consider CBI or otherwise protected should be clearly identified as such and should not be submitted through e-mail. If you send e-mail directly to EPA, your e-mail address will be captured automatically and included as part of the public comment.

After EPA has considered all relevant comments received prior to the end of the public comment period and a nts made during the public hearing, EPA will decide whether or not to proceed with the adoption of EPAS roposed feedrate limits and monitoring reg

If EPA decides to adopt the proposed feedrate limits and monitoring requirements, the final permit will become effe tive 30 days after the service of notice of the decision, pursuant to 40 C.F.R. § 71.11(i)(2), unless (i) a later effective date is specified in the decision; (ii) review is requested under 40 C.F.R. § 71.11(I) (in which case the specific terms and conditions of the permit which are the subject of the request for review shall be stayed); or (iii) no comments requested a change in the draft permit, in which case the permit shall become effective immediately upon issuance.

The final permit is a public record that can be obtained upon request. A statement of reasons for changes made to the draft permit and responses to comments received will be sent to all persons who commented on the draft permit. Please note that an e-mail or postal address must be provided with your comments if you wish to receive direct notification of EPA's final decision regarding the permit and its responses to comments submitted during the public comment period. If you believe any condition of the draft permit is inappropriate or that our initial decision to prepare the draft permit is inappropriate, you must raise all reasonably ascertainable issues and submit all reason ably ascertainable arguments supporting your position by the end of the comment period.

E. Appeal Procedures

Within 30 days after a final permit decision has been issued, any person who filed comments or participated in the accordance with 40 C.F.R. § 71.11(I). Appeals should be filed with the Hearing Clerk at the following address

> ironmental Appeals Board U.S. Environmental Protection Agency 401 M Street, SW Washington, DC 20460
